Coffee Sales Analysis Dashboard

Project Overview
This project focuses on analyzing raw coffee sales data and converting it into a structured, interactive dashboard using Microsoft Excel.

Files in This Repository
• coffeeOrdersData.xlsx — Raw dataset containing order-level coffee sales information.
• coffeeSalesDashboard.xlsx — Cleaned data with formulas, pivot tables, and an interactive dashboard.

Work Done
• Cleaned and prepared raw data by fixing formats and removing inconsistencies
• Used Excel formulas to create calculated fields and metrics
• Built pivot tables to analyze sales by product, time period, and category
• Created visualizations and a dashboard to present key insights clearly

Tools Used
Microsoft Excel (Data Cleaning, Formulas, Pivot Tables, Data Visualization)

Key Learnings
• Working with real-world datasets
• Structuring data for analysis
• Communicating insights through dashboards
